Package 'rhoMatrix'

November 8, 2026

Title Correlation Matrices from Covariance Matrices

Version 0.0.1

Description Correlation matrices from covariance matrices.
Each exported function has an internal version without input checks
that other projects can copy.

RhoofSigma *Correlation Matrix from a Covariance Matrix*

Description

Computes the correlation matrix $\boldsymbol{P} = \boldsymbol{Q}\boldsymbol{\Sigma}\boldsymbol{Q}$, where $\boldsymbol{Q}$ is the diagonal matrix of the inverse standard deviations.

Usage

```
RhoofSigma(x)
```

Arguments

x	Numeric matrix. Covariance matrix ($\boldsymbol{\Sigma}$), square with positive diagonal elements.

Value

Returns a numeric matrix of the dimensions of x, with the dimension names of x.

Author(s)

Ivan Jacob Agaloos Pesigan

Examples

```
RhoofSigma(x = cov(mtcars[, c("mpg", "wt", "hp")]))
```
